

## **New Paradigm for Precision Neuro-oncology: AI-Assisted Stereotactic Radiosurgery**

Dr. Jen-Tang (JT) Lu is the founder and CEO of Vysioneer, a Boston-based oncology AI company. Powered by proprietary AI technology, Vysioneer leads the way in transforming cancer care through AI-assisted clinical workflows, informed treatment decisions, and accelerated clinical trials.

In this talk, Dr. Lu will present the first FDA-cleared AI solution for brain tumor management in SRS, highlighting its impact on enhancing treatment precision, streamlining clinical workflows, and improving patient outcomes. Through research findings and real-world cases, discover how AI is setting new standards for precision and personalized care in neuro-oncology.
